Option 1

Smart Evolution

We don't need to evolve radically, we are already the fastest and spectacular class.

Strong class growth, premium services and smart equipment evolution for 2024 and beyond Olympic Games.

RS:X

NEILPRYDE

RS:X Facts

Performance :

- wind range from 3 to 30 knots
- top speed of 30 knots
- equipment can be used with any race course format
- on its fin in 10 knots of wind

Longevity :

- first generation boards are still racing in youth championships
- masts and booms resist to huge equipment stresses
- sails performs without any major breakage issues despite multiple and violent downhaul/ outhaul trimming changes during races and training

Option 2

Flying Generation

We evolve radically embracing the X Games and America's cup DNA with a new flying/ slalom convertible machine.

Flying with a foil from 5 to 14 knots, blasting with a fin above 14 knots with the same board and the same rig.

New race formats for more spectacle, drama and fun.

We attract more audience, media, sponsors and become part of the flying generation.

RS:X Convertible

Performances :

- wind range from 5 to 30 knots
- top speed of 40 knots
- equipment can be used with any race course format
- High speed, high adrenaline, no compromise
